Am Großen Berge 45, Frankfurt am Main · Residence Permit: Eligible to work in Germany

PROFILE

Risk and quantitative analytics professional with 4+ years of experience across banking, asset management, insurance, FinTech and risk advisory. Experienced in credit risk modelling, PD/LGD/EAD and expected loss calculations, Python-based analytics, large financial datasets, data quality analysis, portfolio monitoring, regulatory reporting and model validation.

PROFESSIONAL EXPERIENCE

Investment Data Services GmbH, Allianz Group

Frankfurt am Main, Germany

Working Student – Asset Management Solutions, Risk Reporting

11/2024 – Present

- Delivered leverage, VaR, liquidity, NAV reconciliation and fund data quality reporting, supporting portfolio risk monitoring across approximately EUR 400bn AUM
- Analyzed large fund and risk datasets to identify data deficiencies, reporting exceptions and reconciliation breaks, strengthening data quality and model-input reliability
- Automated data quality checks for fund data, strengthening daily controls and reducing manual review time by up to 50%
- Developed dashboards for portfolio risk and fund performance reporting, enabling stakeholders to monitor KPIs, risk trends and analytical outputs

Deloitte, Offices of the US

Gurugram, India

Solution Advisor – Risk and Financial Advisory

11/2020 – 07/2024

- Supported banking, insurance and FinTech clients on risk, data and regulatory transformation initiatives, translating analytical requirements into solution concepts and implementation documentation
- Built scalable ETL/ELT and BI reporting pipelines using Snowflake, dbt, Airflow, SQL, Python and Tableau, enabling teams to monitor operational, regulatory and risk KPIs
- Designed cloud-based data solutions and analytical data models for credit teams, improving data uniformity and processing speed by approximately 30%
- Supported quality assurance, testing, documentation and stakeholder sign-off for risk reporting, controls automation and data-driven compliance solutions
- Prepared management-ready documentation and analytical summaries for senior stakeholders

SKILLS

Risk Methodology: Credit Risk, PD Modelling, LGD, EAD, Expected Loss, Rating Methodology, Model Calibration, Statistical Analysis, Financial Engineering, Risk Management, VaR, Stress Testing, Sensitivity Analysis, Portfolio Monitoring, Early Warning Indicators, Risk Bands

Data & Programming: Python, SQL, PostgreSQL, Snowflake, dbt, Airflow, BigQuery, Data Models, Excel VBA, Power BI, Tableau, Git, Jira, Confluence, MLFlow, n8n, Zapier

Regulation & Model Governance: Basel III, IFRS 9, Regulatory Reporting, Model Documentation, QA, Testing

Languages: English C2 / Native-level, German A2 pursuing B1

RECENT PROJECTS (PROJECTS WITH FULL DOCUMENTATION ON [GITHUB](#))

Credit Risk PD and Early Warning Model

05/2026

- Developed a probability of default model to classify borrower credit risk using financial, behavioural and macroeconomic features, creating explainable risk bands, early-warning indicators and portfolio monitoring outputs

Regime-Aware Fixed Income Portfolio Allocation Model (cvxpy, scipy)

12/2025

- Portfolio allocation model for fixed income securities that adapts to different market regimes, including regime detection, dynamic asset allocation, and risk management strategies

Risk Modelling – Value at Risk (VaR)

05/2025

- Implemented Value at Risk models for portfolio risk assessment, including multiple VaR calculation methods, structured validation checks and backtesting frameworks

EDUCATION

Frankfurt School of Finance & Management

Frankfurt am Main, Germany

Master of Finance

08/2024 – 06/2026 expected

Thesis: Multi-Modal Information Synthesis using LLMs for Portfolio Optimization

Relevant Courses: Financial Engineering, Risk Management, Statistics & Econometrics, Financial Products and Modelling, Portfolio Management, Derivatives, Bank Treasury and Controlling, Data Analytics and Machine Learning

Jaypee Institute of Information Technology

Noida, India

B.Tech, Computer Science and Engineering

07/2016 – 05/2020

Relevant Courses: Database Systems, Automation Design, Software Construction, Machine Learning, Blockchain Technology, Information Security
