Am Großen Berge 45, Frankfurt am Main · Residence Permit: Eligible to work in Germany, willing to relocate

PROFILE

Finance-tech professional with experience in financial engineering, client-facing delivery, end-to-end technical solutions, automation, and regulated financial-services environments. Skilled in Python, machine learning and financial modelling, with research projects in portfolio optimisation, market microstructure and ML for financial markets.

PROFESSIONAL EXPERIENCE

Investment Data Services GmbH, Allianz Group

Frankfurt am Main, Germany

Intern - Asset Management Solutions (Risk)

12/2024 – Present

- Testing workflows and Implementation of AI automation use cases for fund operations
- Automated Leverage, VaR and Liquidity reports supporting portfolio risk management across ~ Euro 400 bn AUM
- Implemented automated data integrity checks for NAV reconciliation and fund static data maintenance, ensuring accuracy across fund structures and supporting daily operational controls
- Supported Migration of in-house tools to cloud platforms, enhancing scalability for risk analytics
- Built SQL based automation to streamline reporting workflows for portfolio managers and risk teams

Deloitte (Offices of the US)

Gurugram, India

Solution Advisor (Engineering), Risk and Financial Advisory

11/2020 – 07/2024

- Advised banking, insurance and FinTech clients on digital transformation initiatives, leading end-to-end project delivery from requirements analysis and solution design through to implementation and stakeholder sign-off
- Spearheaded DevOps for automation of controls testing, reducing SOC audit costs by ~15% annually
- Built data analytics dashboards that provided actionable insights to stakeholders across business units
- Designed cloud based Data Warehouse and Data Mart solutions for clients, improving data uniformity and speed by ~30% for risk/compliance teams

SKILLS

Technical: Python, PostgreSQL, BigQuery, RAG, NLP, Git, AWS, PowerShell, VBA, Machine Learning, Docker, A/B Testing, OracleSQL, PowerBI, Tableau, Confluence, Jira, Claude, MLFlow, Selenium, dbt, Snowflake, Airflow, Kubernetes

Languages: English (C2; Native), German (A2, pursuing B1)

Finance: Bloomberg Terminal, Portfolio Optimization (cvxpy, scipy), DCF Valuations and Modelling, IFRS, MiFID, UCITS, DORA, FinBERT, AIFMD, ABOR & IBOR, FactSet, IRR, Stress Testing, VaR, Sensitivity Analysis, Fund Operations

RECENT PROJECTS (PROJECTS WITH FULL DOCUMENTATION ON [GITHUB](#))

Yield Curve principal component analysis (scikit-learn)

03/2026

- Decomposing US Treasury yield curve moves into principal components, calibrating historical shocks and pricing a fixed income portfolio, and attributes P&L under each scenario.

OTC Margining simulator (python, scipy)

02/2026

- A Monte Carlo study of liquidity risk, fire-sale dynamics, and procyclical margin requirements in non-centrally-cleared derivatives markets.

Twitter Financial Sentiment Analysis (NLP, nltk, scikit-learn)

12/2025

- Machine Learning based classification of financial tweets as Bearish (0) or Bullish (1) comparing traditional ML classifiers (TF-IDF) and FinBERT embeddings.

Risk Modelling – Value at Risk (VaR)

05/2025

- Implementation of Value at Risk (VaR) models for portfolio risk assessment, featuring multiple VaR calculation methods and backtesting frameworks for a complex model capital market portfolio

Regime-Aware Fixed Income Portfolio Allocation Model (cvxpy, scipy)

12/2025

- Portfolio allocation model for fixed income securities that adapts to different market regimes, including regime detection, dynamic asset allocation, and risk management strategies

EDUCATION

Frankfurt School of Finance & Management

Frankfurt am Main, Germany

Master of Finance

08/2024 – 06/2026 (expected)

Thesis Title: Multi-Modal Information Synthesis for Portfolio Optimization: Incorporating LLLMs in Portfolio Management

Relevant Courses: Statistics & Econometrics, Financial Products and Modelling, Financial Engineering, Portfolio Management, Derivatives, Risk Management, Data Analytics and Machine Learning, Bank Treasury and Controlling, FinTech

Jaypee Institute of Information Technology

Noida, India

B.Tech, Computer Science and Engineering

07/2016 – 05/2020

Relevant Courses: Database Systems, Automation Design, Software Construction, Machine Learning, Blockchain Technology
